Graphing Your Data from Baseline and Treatment Phase
5 points

Name: _____ ID#: _____

TARGET BEHAVIOR GRAPH   3 points

Instructions: Now that your treatment phase is almost complete, or complete, depending on the timing of when your instructor started the treatment phase and when this assignment is due, you will now graph most or all of your data. Follow the instructions given in Section 15.1.3.

Your graph is required to include the following:

- An x-axis properly labeled Week 1, Week 2…. Week 5

- A y-axis properly labeled and with a reasonable scale

- A line graphing the data from 5 or 35 days (5 is the total number of weeks and 35 is the total number of days including baseline and treatment phases)

- Phase line

- Phase labels

- Title of your graph

- Figure caption

TOKENS GRAPH   2 points

Instructions: You will also submit the Treatment Phase **Tokens** Graph too for instructor feedback. See Section 15.1.3 for guidance on what is required.

Note: If you are unsure of how to properly graph, see your instructor before the assignment is due.

APA format is expected for Figure titles and captions.
