A

A-B Design – Section 2.2.5

A-B-A-B Reversal design – Section 2.2.5

ABC charts – Section

Abolishing operation – Section 2.1.3; Section 6.3.5

Adjusting schedules – Section 6.4.5

Advertising – Section 5.6

Afferent neurons – Section 10.5

Amnesia – Section 8.3

Animal models of behavior – Section 2.4.1

Appetitive conditioning – Section 4.1.3.2

Applied science – Section 1.2.2

Aristotle – Section 1.1.2.2

Attention – Section 11.1.1

 Issues with – Section 11.1.2

Aversive conditioning – Section 4.1.3.2

Aversive control – Section 6.7

Avoidance theory of punishment – Section 6.7.4.2

B

Backward conditioning – Section 4.1.3.4

Baseline phase – Section 2.1.3; Section 7.4.3

Basic science – Section 1.2.2

Behavior – Section 1.2.1

Behavioral contract – Module 7

Behavioral definition – Section 2.1.2; Section 7.3.1

Behaviorism, its rise – Section 1.1.5.5

Biological preparedness – Section 5.1.1.1

Biology, and psychology – Section 1.1.4

Bobo doll experiment – Section 8.2

Blocking – Section 4.2.5

Brain structures – Section 10.4.1

Break point – Section 6.4.4.3

C

Case studies – Section 2.2.2

Chained schedules – Section 6.4.5

Changing criterion design – Section 2.2.5

Cognition – Section 13.2.1

Cognitive psychology – Section 1.1.5.6

Communication, in the nervous system – Section 10.1.1

Compensatory response model – Section 4.3.3

Competing behavior – Section 7.3.1

Complex schedules – Section 6.4.5

Concepts – Section 13.2.2

Concurrent schedules – Section 6.4.5

Conditioned emotional response technique – Section 5.2.1

Conditioned suppression theory of punishment – Section 6.7.4.1

Conjunctive schedules – Section 6.4.5

Connectionism – Section 6.1.1

Contiguity – Section 2.1.3; Section 6.3.2

Contingency – Section 2.1.2

 In operant conditioning – Section 6.2.2; Section 6.3.1

Contingent exercise – Section 6.7.3.4

Continuous recording – Section 2.2.6

Contrived reinforcers – Section 6.3.8

Controlled (and controlling) responses – Section 7.1.1

Cooperative schedules – Section 6.4.5

Correlational research – Section 2.2.4

Counterconditioning – Section 5.1.2.2

D

Darwin – Section 1.1.4

Data collection, in behavior modification – Section 7.4.1

Delay conditioning – Section 4.1.3.4

Deferred imitation – Section 8.3

Dependent measures – Section 2.3

Descartes – Section 1.1.2.3

Determinism – Section 1.1.2.5

Dewey – Section 1.1.5.3

Differential Reinforcement – Section 6.4.6

Differential Reinforcement of Alternative Behavior (DRA) – Section 6.4.6.1

Differential Reinforcement of High Rates of Responding (DRH) – Section 6.4.6.5

Differential Reinforcement of Incompatible Behavior (DRI) – Section 6.4.6.4

Differential Reinforcement of Low Rates of Responding (DRL) – Section 6.4.6.3

Differential Reinforcement of Other Behavior (DRO) – Section 6.4.6.2

Discriminated avoidance procedure – Section 6.7.1

Discrimination

 In operant conditioning – Section 6.6.2

 In respondent conditioning – Section 4.2.2

Discrimination hypothesis – Section 6.8.1

Discrimination training – Section 6.6.2

Discriminative stimuli – Section 6.2.4; Section 6.6.4

Dishabituation – Section 3.4.1

Divided attention – Section 11.1.3

Dual-process theory – Section 3.4.3

Dualism – Section 1.1.2.3

Duration – Section 2.3.4

Duration schedules of reinforcement, fixed and variable – Section 6.4.4.1

E

Ebbinghaus – Section 1.1.5.1

Efferent neurons – Section 10.5

Elicited behaviors – Section 3.1

Emotional intelligence – Section 13.5.4

Empiricism – Section 1.1.2.6

Errors – Section 2.3.1

Establishing operation – Section 2.1.3; Section 6.3.5

Ethics, research – Section 2.4.2

Evaluative conditioning – Section 5.4

Excitatory conditioning – Section 4.1.3.3

Experiments – Section 2.2.5

Exposure treatments – Section 5.1.2.3

Extinction

 In operant conditioning – Section 6.8.1

 In respondent conditioning – Section 4.2.1

Extinction burst – Section 6.8.1

Extrinsic reinforcement – Section 6.3.6

Eyeblink conditioning – Section 5.2

F

Fading – Section 6.6.5

Fixed Duration (FD) schedule – Section 6.4.4.1

Fixed Interval (FI) schedule – Section 6.4.2.3

Fixed Ratio (FR) schedule – Section 6.4.2.1

Fixed Time (FT) schedule- Section 6.4.4.2

Flooding – Section 5.1.2.4

Fluency – Section 2.3.8

Forgetting – Section 11.3.2

Frequency – Section 2.3.2

Functional assessment – Section 7.4.2

Functional relationship – Section 2.1.2

Functionalism – Section 1.1.5.3

G

Generalization

 In operant conditioning – Section 6.6.3

 In respondent conditioning – Section 4.2.2

Generalized imitation – Section 8.1.3

Generalized reinforcers – Section 6.2.3

Gestalt psychology – Section 1.1.5.4

Goals and goal setting – Section 7.3.2

Guided compliance – Section 6.7.3.4

H

Habit behaviors – Section 7.5.3.1

Habit strength (formation) – Section 6.5.1

Habituation – Section 3.4.1

Hartley – Section 1.1.2.6

Hearing – Section 10.2.3

Heuristics – Section 13.4.2

Higher order conditioning – Section 4.1.3.1

History, what is it – Section 1.1.1

History of control – Section 5.1.1.1

Hull's drive reduction theory – Section 6.5.1

Human models of behavior – Section 2.3.2

Hume – Section 1.1.2.6

I

IACUC – Section 2.4.1

Imaginal exposure – Section 5.1.2.3

Imitation – Section 8.1.3

Immediacy, in operant conditioning – Section 6.3.3

Individual differences – Section 6.3.7

Inhibitory conditioning – Section 4.1.3.3

Intellectual disabilities – Section 13.6.1

Intelligence – Section 13.5

Intensity – Section 2.3.3

Interval recording – Section 2.2.6

Intrinsic reinforcement – Section 6.3.6

IRBs – Section 2.4.2

J

Journals – Section 1.3

K

Kohler – Section 1.1.5.4

L

Language – Section 12.1.1

 Development across the life span – Section 12.2

 Learning a second one – Section 12.3

Language acquisition device – Section 12.2.5

Latency – Section 2.3.5

Lateral inhibition – Section 4.2.4

Law of effect – Section 6.1.1

Learning – Section 1.2.1

Learning disabilities – Section 13.6.2

M

Mackintosh's Attentional Model – Section 4.3.5

Magnitude – Section 6.3.4

Maintenance phase – Section 7.8.1

Maladaptive cognitions – Section 7.5.3.2

Mazes, types of – Section 2.2.7

Materialism – Section 1.1.2.5

Mechanism – Section 1.1.2.4

Memory – Section 1.2.1; Section 11.2.1

 Three stages – Section 11.2.2

Memory errors – Section 11.3.1

Mental images – Section 13.2.5

Mill, J.S. – Section 1.1.2.6

Mixed schedules – Section 6.4.5

Modal action patterns (MAPs) – Section 3.3

Modeling – Section 5.1.1.1; Section 8.4

Morgan – Section 1.1.5.3

Motivating operations – Section 6.3.5

Multiple baseline design – Section 2.2.5

Multiple schedules – Section 6.4.5

N

Natural reinforcers – Section 6.3.8

Neural Impulse – Section 10.3

Neuron – Section 10.1.3

Noncontingent schedules of reinforcement, fixed and variable – Section 6.4.4.2

O

Observational learning – Section 8.1.1

Observational research – Section 2.2.1

Occasion setting – Section 4.2.6

One-process theory of avoidance – Section 6.7.2

Operant behaviors – Section 6.1.2; Section 6.2.1

Operant conditioning – Modules 6 and 7

 Defined – Section 6.2.1

Opponent process theory of emotion – Section 3.4.4

Overcorrection – Section 6.7.3.3

Overshadowing – Section 4.2.5

P

Partial reinforcement effect – Section 6.8.1

Parts, of the nervous system – Section 10.1.2

Pavlov, Ivan – Section 4.1.1

Perception – Section 10.4.2

Philosophy, what is it and importance to psychology – Section 1.1.2.1

Phobias

 learning – Section 5.1.1

 types of – Section 5.1.2.1

Physical restraint – Section 6.7.3.4

Physiology, and psychology – Section 1.1.3

Piaget's theory of cognitive development – Section 13.1

Positive practice – Section 6.7.3.3

Premack principle – Section 6.5.2

 And punishment – Section 6.7.4.4

Preparatory response theory – Section 4.3.2

Primary drives – Section 6.5.1

Primary reinforcers (and punishers) – Section 6.2.3

Problem solving – Section 13.3

Product (or outcome) recording – Section 2.2.6

Progressive Ratio (PR) schedule – Section 6.4.4.3

Progressive schedules – Section 6.4.4.3

Prompts – Section 6.6.5

Propositions – Section 13.2.3

Pseudoconditioning – Section 4.1.4

PTSD – Section 5.5

Punishment – Section 6.2.2; Section 6.7.3

 Benefits of – Section 6.7.6

 Problems with – Section 6.7.5

Q

R

Rate – Section 2.3.7

Reasoning – Section 13.4

Reductionism – Section 1.1.2.5

Reflex arc - Section 3.2

Reflexes – Section 3.2

Reinforcement – Section 6.2.2

Reinforcement schedule – Section 6.4.1

 Simple schedules – Section 6.4.2

Relapse prevention – Section 7.8.2

Rescorla-Wagner Model – Section 4.3.4

Research article, parts of – Section 2.2.8

Resistance to extinction – Section 6.8.1

Respondent behaviors – Section 6.1.2; Section 6.2.1

Respondent conditioning, described – Section 4.1.2

Response – Section 2.1.3

Response costs – Section 6.7.3.2

Response deprivation hypothesis – Section 6.5.3

Restitution – Section 6.7.3.3

Romanes – Section 1.1.5.3

Rules – Module 7

S

Schemas – Section 13.2.4

Scientific method – Section 2.1

Secondary drives – Section 6.5.1

Secondary reinforcers (and punishers) – Section 6.2.3

Self-control – Section 7.1.1

Self-efficacy – Section 7.2.2

Self-instructions – Section 7.5.2

Self-regulation – Section 7.1.1

Sensation – Section 10.2.1

Sensitization – Section 3.4.2

Sensory preconditioning – Section 4.2.3

Shaping – Section 6.6.6

Shuttle avoidance – Section 6.7.1

Shuttle box – Section 6.7.1

Sign stimuli – Section 3.3

Simultaneous conditioning – Section 4.1.3.4

Skinner – Section 6.1.2

Smell – Section 10.2.5

Social learning theory – Section 8.1.2

Social support – Section 7.5.2.2

Societies, professional – Section 1.3

Speech – Section 12.1.1

 Elements of – Section 12.1.2

Spontaneous recovery

 In operant conditioning – Section 6.8.2

 In respondent conditioning – Section 4.2.1

Stages of change, DiClemente – Section 7.2.1

Stages of cognitive development, Piaget – Section 13.1.2

Steps in the process of change – Section 7.1.2

Stimulus – Section 2.1.3

Stimulus control – Section 6.6.1

Stimulus discrimination – Section 6.6.2

Stimulus enhancement – Section 8.3

Stimulus generalization – Section 6.6.3

Stimulus substitution theory – Section 4.3.1

Structuralism – Section 1.1.5.2

Suppression ratio – Section 5.2.1

Survey – Section 2.2.3

Systematic desensitization – Section 5.1.2.3

T

Tandem schedules – Section 6.4.5

Taste – Section 10.2.4

Taste aversions – Section 5.3

Taste preferences – Section 5.4

Temperament – Section 5.1.1.1

Temporal factors, and conditioning – Section 4.1.3.4

Temptations – Module 7

Thorndike – Section 6.1.1

Time outs – Section 6.7.3.1

Titchener – Section 1.1.5.2

Token economy – Section 7.5.4.1

Tolerance – Section 3.4.1

Topography – Section 2.3.6

Touch – Section 10.2.6

Trace conditioning – Section 4.1.3.4

Transformational rules – Section 12.2.5

Treatment phase – Section 2.1.3; Section 7.6

Trial – Section 2.1.3

Trial and error learning – Section 6.1.1

Two-process theory of avoidance – Section 6.7.2.

Two-process theory of punishment – Section 6.7.4.3

U

Universal grammar – Section 12.2.5

US preexposure effect – Section 4.2.4

V

Variable Duration (VD) schedule – Section 6.4.4.1

Variable Interval (VI) schedule – Section 6.4.2.4

Variable Ratio (VR) schedule – Section 6.4.2.2

Variable Time (VT) schedule – Section 6.4.4.2

Variables – Section 2.2.5

Vicarious reinforcement/punishment – Section 8.1.2

Vision – Section 10.2.2

W

Watson – Section 1.1.5.5

Wundt – Section 1.1.2.5

X

Y

Z
